

EXPERIMENT 2

Create a simple cloud software application for Flight Reservation System using any Cloud Service Provider to demonstrate SaaS

The screenshot displays a web application titled "Flight Reservation System" in a development environment. The interface includes a top navigation bar with the application name, a "Development" status indicator, and user controls like "View as: MySelf" and a trial expiration notice. A left sidebar contains a menu with "Flight Reservation system", "Passenger Details" (selected), and "All Passenger Details". The main content area is titled "Passenger Details" and contains a form with the following fields: "Name" (split into "First Name" and "Last Name"), "DOB" (with a date picker), "Email" (with an email icon), "Phone", "Passport number", and "VISA number". Each of the last four fields has a dropdown menu showing the Indian flag and the number "+91 • 81234 56789". At the bottom of the form are "Submit" and "Reset" buttons.
